Seasonal Poetry

Like poetry, Christmas is defined by the underlying meanings and traditions that are personal to the beholder. As the nights become frosty and the days grow shorter, we are drawn to our homes, where lighted candles and comforting Christmas rituals performed in the company of loved ones can keep us warm.

Whether sitting down with the smallest members of the household to carefully cut, glue and fold unique decorations for the Christmas tree, driving through the snow to share a cup of mulled wine with our grandparents or spending hours foraging the forest floor with friends for decorative elements for a festive table setting, Christmas represents a sacred, cherished time of year where we take time to nurture the unique bonds that we have formed with our loved ones.

This is why Christmas is more than just a season – the treasured rituals that so often have been established over generations enact a distinct feeling of togetherness, bringing us closer to the people we love.

Each morning, the patter of little feet eagerly making their way to the Christmas Calendar filters through the home, full of gleeful anticipation for unwrapping that day's little gift. As we set the Christmas table with a delightful mix of inherited silverware and contemporary decorations, old traditions are upheld while new rituals are formed for future generations to come. These are the small pieces of poetic magic that evoke the spirit of Christmas in all of us.

Love,

Scented Christmas Calendar

A few things let you find your holiday spirit as quickly as the characteristic scents of Christmas. And they do not all need to come from actual Christmas trees and baked goods, so we present a lovely cinnamon-scented soy wax candle. In Denmark, a cherished tradition is the kalenderlys, or Christmas Calendar Candle. The idea is to burn it each day, counting down the days to Christmas. We have taken a modern approach to this ritual, and this candle has a chart on the front of the glass container, where you can cross off each day until Christmas Eve.

CERTIFICATION & TESTING

We work with certifications and testing to ensure working conditions in our supply chain are safe and fair and that our products are responsibly produced and of high quality.

Where relevant, products are tested before they become part of our collection. This includes lighting, furniture, outdoor pieces, and kitchen and kids' products. In order to adhere to REACH regulations, accredited testing agencies, such as The Danish Technological Institute, conduct tests on our products through processes defined by law.

In collaboration with Danish company, Malbar, we are using their Climate Screening Tool to measure the CO₂ footprint of our products. We are currently onboarding six of our key suppliers to measure our climate impact from raw materials to arrival of final products at our warehouse. Through this process, we will gain knowledge and data for our future targets.

We currently work with the following certifications:

NORDIC SWAN ECOLABEL – A Nordic Swan Ecolabelled candle is a candle meeting specific criteria for environmental performance, health aspects, quality and safety.

GOTS – The Global Organic Textile Standard. Recognised as the world's leading processing standard for textiles made from organic fibres. It defines high-level environmental and social criteria along the entire organic textiles supply chain.

OCS – The Organic Content Standard or Organic Blended verifies the presence and amount of organic material in a final product, tracking the flow of a raw material from its source to the final product.

FSC™ – The Forest Stewardship Council. An international, non-profit labelling scheme for wood and paper. In FSC™ forestry, no more wood is felled than the forest can naturally reproduce. At the same time, FSC™ is a guarantee that people who work within the entire supply chain are treated legally and ethically, and that animals and plant life are protected.

BSCI – Business Social Compliance Initiative. An industry-driven initiative by AMFORI, which aims to monitor and assess workplace standards across global supply chains. An AMFORI BSCI audit helps us to ensure that all our key suppliers treat their workers legally and ethically.

Our Code of Conduct is based on the Ten Guiding Principles of the UN Global Compact. It defines the ethical principles of our business and has been signed by all our partners and suppliers.

The purpose of the principles set out in our Code of Conduct is to protect workers' health, ensure their safety during production, and ensure an ethical and fair partnership for everybody.

Find our Code of Conduct and information on our work with UN Global Compact on fermliving.com

RESPONSIBLE PRODUCTS – Items with this tag are either FSC™-, GOTS- or OCS Organic Blended-certified or produced in recycled materials as recycled glass, recycled aluminium, recycled paper pulp or in PET yarn made from post-consumer plastic bottles. Look for our certified products in the catalogue.

We continuously work towards having more responsible products in our collection. Read more about our work with responsibility fermliving.com/pages/sustainability
