The Harbour Chair – an armchair with a continuous, enveloping shell – is available with textile and leather upholstery or with a bare shell. MENU's upholstered chairs are priced in four categories. Prices vary depending on the textile or leather you select.

The Harbour Chair is now available with a swivel base in powder-coated aluminium in black or in polished aluminium. Choose between swivel or swivel with return, with or without caster wheels.

The Harbour Chair – a sublimely comfortable pairing of versatility and minimalist style – now offers even more base options for living and working the way you like. First, there's a swivel version for unmatched freedom of movement and, if you choose, easy rolling. And second, you'll find sleek bar and counter base options that let you pull your favourite chair up to your favourite surface, whatever its height.

Once you've chosen the Harbour Chair shell style that will be cradling and supporting your body, you can now also choose a clover-shaped swivel base so you can spin around as needed – and roll around as wanted, should you opt for caster wheels. The base is available with either swivel or swivel with return options in three finishes – polished aluminum or powder-coated aluminum in black or light grey.

Both the Harbour Chair swivel base and the bar and counter bases are available with the ergonomic shells of your choice, whether that's upholstered in textile, leather, or not at all. The bare shell is available in six colors, while the textile and leather options come in a range of colors – and can be customized.

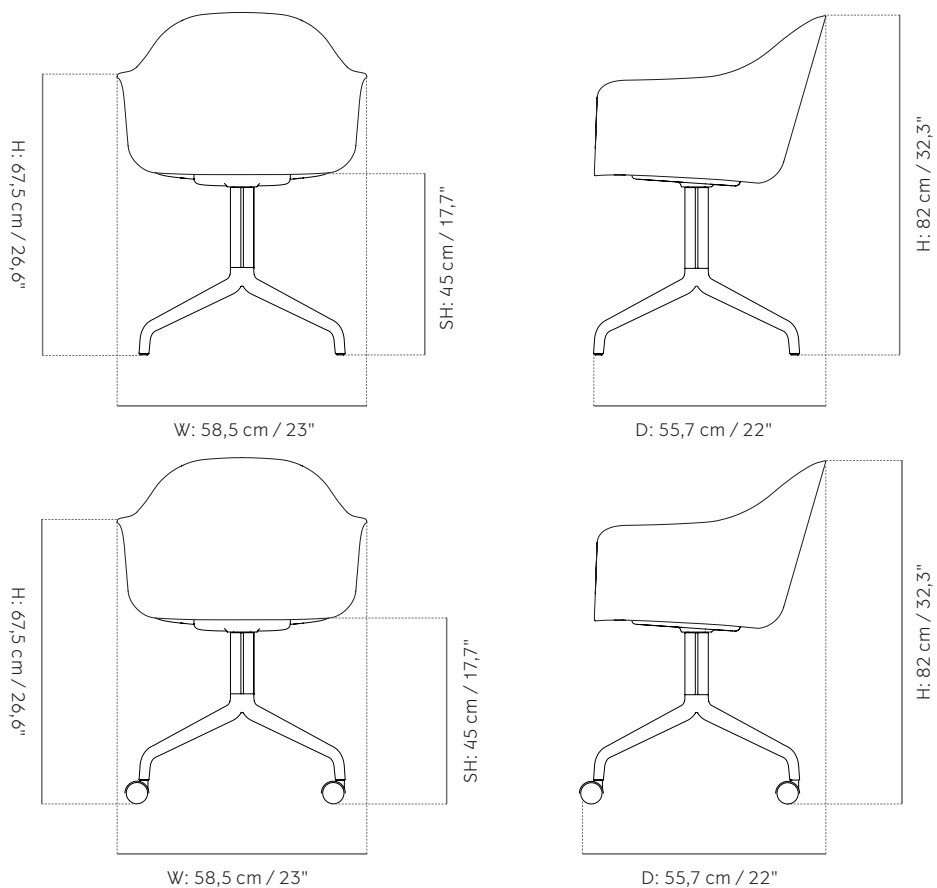

About the Designer

Founded in Copenhagen in 2008 by Jonas Bjerre-Poulsen and Kasper Rønn, Norm Architects specialise in residential architecture, commercial interiors, industrial design, photography and art direction. Today, the group regularly collaborates with MENU, helping to drive the evolution of the brand and its product offerings.

Norm Architects' name reflects the group's emphasis on the importance of drawing inspiration from norms and traditions within architecture and design – particularly the Scandinavian design principles of timeless aesthetics and natural materials, and the modernist values of restraint and refinement. Guided by these principles, Norm Architects produce design that unites good materials and craftsmanship, while embodying beauty, traditions, history and, most importantly, timeless simplicity, where there is nothing more to add or take away.

Harbour Chair, Swivel Base
