**SKAGERAK**  
DENMARK

**SKAGERAK  
INDOOR LIVING**

Welcome to Skagerak's indoor collection. This season, Cutter turns 20. That is quite an accomplishment and it strengthens our belief that it pays to design timeless quality furniture that is able to stand the test of time. Cutter has become quite the modern classic that helps you organize your home in a contemporary and functional way. Home is where the heart is, Elvis Presley sang, and we couldn't agree more. Home is the sense of true well-being, a place where you can express whatever need, desire or skill you have. We'd like to think that our furniture helps you do that: being at ease, surrounded by long-lasting quality.

This year, we introduce several new indoor furniture pieces, a small selection of interior accessories and the brand-new category of lighting. Furniture and lighting are closely connected, and to us, lighting is a natural extension of our interior collection. The lamps Piccolo and Terne both underline the cosy and homely atmosphere – each with its own distinctive and narrative DNA – and we look forward to expanding this field in the future. We also introduce the new dining table Aldus, inspired by the practical trestle tables but with a handmade touch in quality and detailing. In another new development, The Vent (Wait) stool has evolved into a bench with the minimalist expression and sensuous feel that come from working with hand-braided paper cord.

At Skagerak we strongly believe that we can change the world one piece of furniture at a time. That is why we have introduced Reclassic, our take-back system where we offer to buy back your old Skagerak product when you buy a new one, provided that you have maintained it well. Reclassic is another way in which we enter the orbit of sustainability, where furniture that no longer serves its original purpose can become useful in a new context. True design quality can only be achieved when a product is made under the right conditions – in harmony with both people and planet. That is why we are proud to say that we have been FSC™-certified since 2003, members of the UN Global compact since 2010 and became a certified B Corp in 2017.

Welcome to Skagerak  
Jesper and Vibeke Panduro

# MAKING SENSE OF SUSTAINABLE CHOICES

*Can we afford to continue business as usual?  
It might sound ironic, but to keep things the  
way they are – we have to change a lot.*

The world population and global middle class are growing rapidly, and more people are moving to the cities. This will increase the demand for basic goods, housing, energy, heating and water. This wouldn't necessarily have to be a problem – if it wasn't for resources becoming scarce, a rising problem in inequality and climate change. The sum of these realities is, like it or not, that we will have to do way more with a lot less. More products, buildings and power – less pollution, CO<sup>2</sup>-emissions and extraction of virgin materials. Is that possible?

The short answer is yes. But we have to think smart, and adapt. We have to start considering environmental and social performances within society as equally important to economic growth and profit. In fact, these elements are each other's preconditions, not counterparts.

And then we have to stop our endless consumption and waste patterns – and see things for what they really are. For too many years have we thrown out useful and valuable materials. Time has come to stop this linear thinking and start putting stuff into circulation. To design things that can be repaired, reused, decomposed and regenerated.

## What we do in Skagerak

In 2017, we joined the global B Corp movement – looking for new ways to use

our business as a force of good. B Corps are certified 'benefit corporations' meeting high standards of social and environmental performance, accountability and transparency.

For us to join B Corp the goal is not to compete to be the best in the world – but to help each other becoming the best FOR the world. And that is vital, for as a globally operating company, we have a great responsibility for today's development.

That's why we're striving to keep the utmost quality in three aspects: design, production and our relation to people and the planet.

An example of this is our newest initiative – Reclassic!

To Reclassic something is to pass on a valued item. When one family's cherished classics become a new family's Reclassics. From Skagerak Store in Copenhagen, we promote the buying and selling of used Skagerak furniture – some dating 20 years back. This way, we keep valuable material in circulation rather than seeing it being stored away or thrown out unnecessarily. That's good for society and even better for the environment.

You see, we've always designed things to last for generations. But how do we know they will? What happens when people change their surroundings and needs? When they leave their townhouse behind for a new island adventure, or have to move abroad for the job they've always wanted. In these cases, we make it easier to move on without leaving good things behind. To keep calm and Reclassic.

/ CEO Jesper Panduro

Royal Chair Reclassic  
– still cherished 25 years later.

**"TIME HAS COME TO STOP  
THIS LINEAR THINKING  
AND START PUTTING STUFF  
INTO CIRCULATION.  
TO DESIGN THINGS THAT  
CAN BE REPAIRED,  
REUSED, DECOMPOSED  
AND REGENERATED."**

What has become an old classic  
for one person can become a Reclassic  
for someone else.

Let's change the world, one piece of furniture at a time For Skagerak quality means everything. We approach quality as a three-stage process that begins with aesthetics, takes on substance in the choice and treatment of materials and becomes a sustainable unity when proper production processes and conditions are ensured. We are certified as both FSC and B Corp, which means that we honour the demands and principles of sustainable production and business management. We truly believe that quality is here to stay and that we can make positive changes together.

FSC-certified wood FSC is a global non-profit organisation that ensures responsible forestry. FSC means that the workers never fell more trees than the forest can reproduce and the biodiversity of the woods is preserved. FSC also means that the forestry workers are treated respectfully and have proper working conditions, just as FSC supports and cares for the local community. At Skagerak we are committed to expanding FSC-certified forests, so they can supply more FSC wood in the future. At this time it is still a challenge to ensure FSC teak, but we ambitiously pursue our goal of being 100% FSC-certified across all wood types by 2025.

*Skagerak has been FSC-certified since 2003. Our certificate number is FSC™ C004462.*

UN Global Compact As a member of UN Global Compact, Skagerak incorporates fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption. We incorporate the Ten Principles of the UN Global Compact in our strategies, policies and procedures because we believe it makes a difference, and because we want to uphold our basic responsibility to people and the planet. Every year we report our actions directly to the UN Global Compact.

*Skagerak joined the UN Global Compact in 2011.*

B Corp is another priority that we are particularly proud of. B Corp – Benefit Corporation – is about balancing purpose and profit and using business as a force for good. As a B Corp member we set the highest standards for social and environmental performance, accountability and transparency and strive to incorporate these ambitions into our everyday business practices.

*Skagerak was certified as a B Corp business in 2017.*

Reclassic At Skagerak we are dedicated to the products we create and to ensuring their long lifespan. That is why we have invented Reclassic. Reclassic is another way that we enter the orbit of maintenance and sustainability. Skagerak lets you return your old furniture in exchange for a new purchase. Reclassic is our take-back guarantee as a further incentive for you to care for your Skagerak furniture and protect the environment. When you buy a new piece of furniture, you can sell it back to us years later, provided it has been well maintained, and the Reclassic piece will get a new life in a new home.

*Reclassic was initiated in 2017.*

Five Year Warranty At Skagerak, long-lasting design means long-lasting life. Our outdoor furniture is built to last, and it lasts longer and better when it is maintained properly. We offer expert guidance on the best care and maintenance of Skagerak furniture, so you can keep your furniture looking beautiful for many years to come.

*We have a five-year guarantee on our products.*

# MATERIALS/ INDOOR

Skagerak uses quality wood. Wood that will stand the test of time and is produced under responsible terms and conditions. We mostly use FSC-certified wood, and we work as ambassadors to help increase the number of certified woods to meet the demand. We are increasing the share of FSC wood in our products every day in pursuit of our ambitious goal of being 100% FSC-certified across all wood types by 2025.

Did you know that the CO<sup>2</sup> contained by FSC wood remains in the timber, even after it has been turned into furniture and is not released into the atmosphere until it is scrapped? This means that if you keep your furniture for 50 years, the CO<sup>2</sup> is contained within the material the entire time.

Oak is a sturdy and hardwearing type of wood containing natural tannins that will protect against bacterial growth. The Skagerak oak comes from European forests and is either 100% FSC<sup>™</sup>-certified or FSC<sup>™</sup>-mix certified, supporting sustainable forest management. Several of our furniture produced in oak can be ordered in treatments that suit your needs. The treatments available are white soap, white oil or natural oil which all protect and strengthen the wooden surface.

Teak is a heavy, hard and sturdy type of wood. The high content of natural oils makes it highly resistant – perfect for functional everyday items in your home such as household articles and furniture. Our 100% FSC<sup>™</sup>-certified Teak comes from Central America and Brazil, while the rest of our Teak comes from plantations in Indonesia and Trinidad; managed to sustain a renewable and reliable supply of wood.

Ash is a light type of wood with a living structure. The Skagerak ash comes from European forests. Its strength and durability make a good choice for indoor furniture and accessories.

Leather is a strong and natural material that gets a beautiful patina over time. We use different types of leather – grain leather when we need the strong durability of the leather, anilin leather for a softer but still natural appearance and protected leather when we need a sturdy material that is easy to clean.

Wool Several of our indoor cushions are made in wool. We have chosen to work with wool because it is a natural material that gives a sublime comfort due to its softness and ability to absorb/give off humidity. Moreover wool is naturally dirt resistant. We use Kvadrat and Gabriel fabrics for our indoor cushions.

Brass is an alloy of copper and zinc, popular for its superb malleability, hardness, corrosion resistance and attractive appearance. Brass will tarnish over time, but with a little care, the surface can be cleaned with brass polish and shine again.

Terracotta is a beautiful looking type of earthenware. All our terracotta products are produced in Portugal where the terracotta is naturally occurring. Our pots and vases are low-fired so we can play with colours and surfaces and our tableware collection is high-fired to give a more sturdy product.
