

Mia / Chair
Design / Jean Nouvel

Test
EN581-1 / EN581-2

Created by the visionary Jean Nouvel, this is a collection that looks to the future to establish itself as an icon of urban furniture. Mia, with its minimal design and formal shapes, can bring character to any setting, both outdoor and indoor. Table and chairs are easily placed, even in the smallest of spaces, bringing an immediate and unmistakable charm to their surroundings. Versatile and iconic Mia furniture offers the perfect blend of design, functionality and strength for simple, sophisticated spaces, both residential and contract.

Description

Code: **410**
Typology: **Chairs**
Collection: **Mia**

Stackable: 10
Static Load: 200 Kg
Test: EN581-1 / EN581-2

Technical Info

Width: **49 cm**
Depth: **52 cm**
Height: **78 cm**
Weight: **6.30 Kg**
Static Load: **200 Kg**

Packaging

Packages: **1**
Pieces for pack: **4**
Dimensions: **101x72x51 cm**
Volume: **0.371 mü**

Polyethylene bag and cardboard box

Cloud Grey

Corten

Materials

Aluminium

Aluminium alloys, particularly suitable for cold-working and for die-casting, appropriately treated to withstand the elements and powder coated.

Maintenance: To keep the product in good condition for a long time, we recommend cleaning it regularly; more often in very damp locations with a marine climate. It is recommended to clean the surfaces using a soft cloth with water or mild detergents. Prolonged and continuous exposure to intense UV radiation or very low temperatures can affect the initial characteristics of the coloured coating, which is made from polyester. We recommend cleaning and storing the products in sheltered places during prolonged periods of non-use and during the winter.

Steel

Iron and carbon alloy, with carbon content below 2%, treated to withstand the elements with the unique EMU-Coat anti-corrosio process.

Maintenance: To keep the product in good condition for a long time, we recommend cleaning it regularly; more often in very damp locations with a marine climate. It is recommended to clean the surfaces using a soft cloth with water or mild detergents. Prolonged and continuous exposure to intense UV radiation or very low temperatures can affect the initial characteristics of the coloured coating, which is made from polyester. We recommend cleaning and storing the products in sheltered places during prolonged periods of non-use and during the winter. To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax.
