

DUKE TABLES

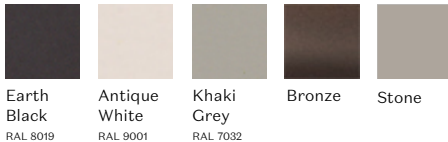

NORR11 Design House

The Duke tables all have a spun aluminium tray, which is loosely placed over a metal frame. The backside of table top is fitted with a non-slippering foam, which ensure stability. Both parts are powder coated in matching colors.

The Duke Series are simple, practical coffee and side tables that are best for indoor use. Designed with consideration of functionality and design purity, the Duke Series comes in small, medium, and large sizes. The ratio of tray size to base size makes the medium size particularly functional, as the base can be rotated onto its different faces to create three different table heights. When all three sizes are placed together, they create a landscape that compliments any sofa.
